

Computer Tech Services & Support

We specialize in the repair and maintenance of all brands of computers, laptops, printers and peripherals. We provide fast and reliable on-site service to the Washington DC metropolitan area for businesses of all sizes as well as home users. All repairs and upgrades are backed by a 90 day warranty.

Network Service:

We provide solid technical consulting which allows our clients to make intelligent business decisions about implementing a computer networking system. We have experience selling, installing and maintaining Novell, Windows NT and Lantastic networks. Our team can install cabling, set up all hardware, configure users and printers, and train your employees to administer the network. Hardware

Hardware Sales:

Our goal is to provide your office or home environment with the computer solution that meets your needs and budget. We sell all major brands as well as a complete line of custom built computers. We build our systems with the highest quality parts and back each sale with a two year on-site warranty for our Northern Virginia customers. A two year depot warranty is available for all customers outside of the Washington DC metropolitan area.

Web Hosting & Domain Name Services:

M.A.S has partner with one of the leading providers of web hosting solutions and services for global business. Thousands of businesses, from all over the World, rely on our advanced, easy-to-use, reliable hosting solutions and award winning customer service to power their online presence.

ISP Services:

Broadband and dail-up Communications that Keep Your Business a Step Ahead. We partner with - The best value in broadband services to bring you the best broadband solution. M.A.S is uniquely able to supply true broadband for small offices/home offices and small to medium businesses. Not residential DSL services repackaged for business, but services specifically for today's rapidly growing and changing businesses.
